COSMIC | SOFTWARE DEVELOPER

June 2022 – Present | Remote

- → Created production grade web application templates with Next.js, Tailwind CSS, and Node.js, and utilized the Cosmic headless CMS to generate new users and offer value to existing customers.
- → Participate in weekly stand-ups with the Developer Experience and Product Teams to conceptualize new features and content to educate new and existing users about the product.
- → Created a quick start guide in the official product documentation, as well as improvements to the documentation to impove clarity of use and overall developer experience for the product.

SOFTWARE PROJEX | WORDPRESS DEVELOPER

May 2021 – June 2022 | Las Vegas, Nevada

- → Developed conversion-first WordPress interfaces that improve user experience and increase consumer retention rates.
- → Worked on the technical support help desk and resolved dozens of support tickets regarding user experience issues.
- → Modernized learning management system to use API integration like Stripe, PayPal, and WooCommerce, improving user experience.

PROJECTS

STEFANKUDLA.COM ↗ | CREATOR

2022

- → Created a full stack web developer portfolio utilizing a headless CMS and APIs.
- → Implemented tasteful UI/UX design along with modern and appealing features like dark mode and animations with Framer Motion.
- → Built with Next.js and Tailwind CSS for the UI, Node.js to query the data from the headless CMS, and Node.js and Oauth2 protocol to authenticate the Spotify API.

BRAINWAVE ↗ | CREATOR

2022

- → Built a front end web app to allow users to create their own account and learn several concepts from courses.
- → Utilized fundamental React concepts like Router V6 and React Hooks.
- → Designed in Figma and built with React.js, TailwindCSS and Firebase.
